EXPERIENCES

Ibinex | Web Developer
March 2018 – September 2018

- Acting Team Lead overseeing the project of the whole team
- Heads requirement analysis for preliminary queries before coding
- Checks each item's progress and sending report directly to the onshore manager
- Hosts daily scrum to transparently set expectations for the team and project managers
- Gathers and analyzes feedback to improve team performance
- Encourages team members to push their limits, and highlighting their efforts
- Replicates, and investigates bugs for fix

OpenText | EDI Developer
February 2015 - August 2017

- Develops and maintains application softwares for clients' B2B transactions
- Reports to the Project Manager (PM) / Delivery Manager (DM) regarding the status of each client's requests
- Coordinates with onshore counterparts (analysts and PMs) to set client expectations during development
- Involves with fixing production issues. To avoid repeating the same mistake, initiated coding practice and process improvements specific for the project
